## LABORATORY TEST REPORT

Regn Date : 05/03/2020 07:57      Sample Collection : 05/03/2020 08:06  
Name : MR. SUJEETH D      Print Date : 12/03/2020 15:29  
Regn No : 27205196      Age / Sex : 32 Years / Male  
Ref By : SELF      Regn Centre : Nellore - 27  
Sample Type : Serum      Ref no. :

### Hepatitis C Virus Antibodies

<u>TEST NAME</u>	<u>RESULT</u>	<u>BIOLOGICAL REFERENCE INTERVAL</u>
Hepatitis C Virus Antibodies <i>Method : Immunodot Assay</i>	: Non Reactive	NA

#### Interpretation :

Nonreactive      Negative for HCV antibodies

Reactive      Presence of detectable HCV antibodies.

- \* This is a rapid qualitative diagnostic test for the detection of antibodies to Hepatitis C virus in human serum.
- \* This test is a screening assay; it should not be used as a sole criterion for detection of HCV.
- \* A Nonreactive screening result does not exclude the possibility of exposure to or infection with HCV.
- \* It is recommended to test further for HCV RNA detection and quantification by PCR, if clinically indicated.
