## LABORATORY TEST REPORT

Regn Date : 05/03/2020 18:01  
Name : MR. ILC  
Regn No : 27205284  
Ref By : SELF  
Sample Type : Serum

Sample Collection : 05/03/2020 18:04  
Print Date : 12/03/2020 15:31  
Age / Sex : 25 Years / Male  
Regn Centre : Nellore - 27  
Ref no. :

### ASO TITRE

#### TEST NAME

#### RESULT

#### BIOLOGICAL REFERENCE INTERVAL

ASO Titre

: Negative

Adult : 0 - 200 IU/mL

Method : Latex Agglutination

#### Comments / Interpretation :

- Useful in diagnosis of Streptococcal pharyngitis and tonsillitis, Scarlet fever etc.
- Indirect diagnostic value in Rheumatic fever and subclinical Streptococcal infection.
- Diagnosis of previous Streptococcal infection is confirmed in the event of titres rising over a period of weeks and then fall slowly.

## LABORATORY TEST REPORT

Regn Date : 05/03/2020 18:01      Sample Collection : 05/03/2020 18:04  
Name : MR. ILC      Print Date : 12/03/2020 15:31  
Regn No : 27205284      Age / Sex : 25 Years / Male  
Ref By : SELF      Regn Centre : Nellore - 27  
Sample Type : Serum      Ref no. :

### Rapid Plasma Reagin Card Test (RPR)

<u>TEST NAME</u>	<u>RESULT</u>	<u>BIOLOGICAL REFERENCE INTERVAL</u>
RPR <i>Method : Slide flocculation</i>	: Non Reactive	NA

#### Interpretation :

Nonreactive      Specimen is negative for Syphilis antibodies or antibodies are at an undetectable level.

Reactive      Specimen is positive for Syphilis antibodies.

- \* A reactive card test may suggest past or present infection with a pathogenic treponeme.
- \* The result of this test should be used in conjunction with other laboratory findings and patient symptoms.
- \* A nonreactive RPR card test result does not rule out an incubating Syphilis infection.
- \* All positive results should be confirmed by Treponemal-specific antibody test such as TPHA.
- \* RPR Titres > 1:8 are considered significant.

Note : RPR test performed in the sample has similar sensitivity and interpretation as VDRL test.

## LABORATORY TEST REPORT

Regn Date : 06/03/2020 18:46  
Name : MR. ILC (27205284)  
Regn No : 432023437  
Ref By : Dr. VIJAYA DIAGNOSTICS LAB  
Sample Type : Serum

Sample Collection : 06/03/2020 18:56  
Print Date : 12/03/2020 15:31  
Age / Sex : 25 Years / Male  
Regn Centre : Kurnool - 43  
Ref no. :

### ASO TITRE SERUM

#### TEST NAME

#### RESULT

#### BIOLOGICAL REFERENCE INTERVAL

ASO TITRE

: Negative

Positive :  $\geq$  200 IU/mL

Negative :  $<$  200 IU/mL

Method : Latex Agglutination

#### Interpretation :

1. Agglutination indicates a ASO content of more than 200 IU/mL in the non diluted serum specimen
2. For positive test the value given is the last dilution with visible agglutination multiplied by the conversion factor
