LABORATORY TEST REPORT

Regn Date : 06/03/2020 19:30
Name : MR. ILC (27205192)
Regn No : 432023454
Ref By : Dr. VIJAYA DIAGNOSTICS LAB
Sample Type : Whole Blood - EDTA

Sample Collection : 06/03/2020 19:40
Print Date : 07/03/2020 17:11
Age / Sex : 14 Years / Male
Regn Centre : Kurnool - 43
Ref no. :

MALARIA PARASITE V & F / ANTIGEN METHOD (RAPID)

<u>TEST NAME</u>	<u>RESULT</u>	<u>BIOLOGICAL REFERENCE INTERVAL</u>
Plasmodium falciparum <i>Method : Immunochromatography</i>	: Negative	NA
Plasmodium vivax <i>Method : Immunochromatography</i>	: Negative	NA

Comments:-

Comments / Interpretation :

- Positive test result indicates the infestation of Malarial parasite.
 - This is only screening test. The results are to be interpreted within epidemiological, clinical & therapeutic context.
 - Even after successful antimalarial therapy the clearance of parasite may take longer, and reaction of the test may remain positive.
- In such cases, test should be repeated after 5 to 10 days of start of treatment.

Certificate # MC-2265
