All reports are for interpretation by the treating doctor only and have to be viewed and correlated with clinical examination and other investigations. 2. All investigations have their limitation which is imposed by limits to sensitivity and specificity of individual assay procedures as well as the quality of the specimen received by the laboratory. Isolated laboratory investigations never confirm the final diagnosis. 3. If the result (s) of tests are alarming or unexpected the doctor is advised to contact the lab immediately for needful and necessary action.
