

National Guidelines for HIV Testing

July 2015

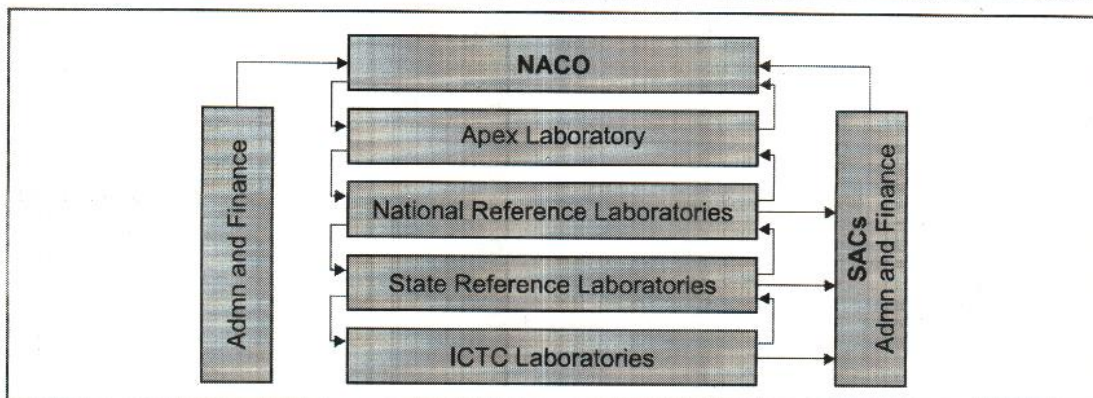

National AIDS Control Organisation
Ministry of Health & Family Welfare, Government of India

The Management of HIV Testing and Reference Laboratories

HIV testing in the National AIDS Control Programme (NACP) is performed by the Integrated Counselling and Testing Centres (ICTCs) and Blood Banks. Quality control for HIV testing is implemented through a chain of SRLs, NRLs and Apex Laboratory.

Table 7.1. Roles and responsibilities of laboratories under the NACO laboratory network

Level	Functions
Tier 1: Apex Laboratory: NARI	To provide technical assistance to the NACP To provide leadership to the laboratory network through NRLs Mentoring and monitoring of NRLs Training and capacity building of NRLs Implementing proficiency testing (EQA) for NRLs
Tier 2: National Reference Laboratories (13)	Mentoring and monitoring of SRLs Training and capacity building of SRLs Implementing proficiency testing (EQA) for SRLs Resolving the retesting discordant results from SRLs
Tier 3: State Reference Laboratories (117)	Mentoring and monitoring of ICTC Labs Training and capacity building of ICTC Labs Implementing proficiency testing (EQA) for ICTC Labs Quarterly rechecking of samples tested (20% positive and 5% negative) at ICTC labs as quality control Resolving the retesting discordant results from ICTC Labs
Tier 4: ICTC Labs (15,606)* Stand alone ICTC: 5694 Mobile ICTC: 124 F-ICTC : 8810 PPP (Public and Private Partnership) ICTC: 1977 * Till March 2014.	Perform HIV tests as per national guidelines Participating in proficiency testing and quality control activities Participate in training activities conducted by SRLs

PROFICIENCY TESTING PROVIDER FOR HIV SEROLOGY

NABL Accredited Laboratory

Ref. No.: ICMR-NARI/NACO/2021/11

Date: 01.02.2021

To,
Dr. Mini Jacob
NRL Incharge
T.N. MGR. Medical University
Chennai

PROFICIENCY TESTING (PT) REPORT FOR HIV SEROLOGY

Name of Proficiency Testing Provider: ICMR-NARI, Pune

Round: I / II (2020-2021)

Name of the participating laboratory: T.N. MGR, Chennai

Lab ID: HIVPT006

Date Panel Distributed: 07.01.2021

Date of Closing: 19.01.2021

Sample code	Your result	True status	Your score
1	Negative	Negative	100 %
2	Negative	Negative	
3	HIV-1 Positive	HIV-1 Positive	
4	Negative	Negative	
5	Negative	Negative	
6	HIV-1 Positive	HIV-1 Positive	
7	Negative	Negative	
8	HIV-1 Positive	HIV-1 Positive

Proficiency Testing Scheme for HIV Serology

Group Performance

Graphs showing variation in performance between participants

Comparison of kits used by participants

Your Center

Other Information:-

1. Proficiency test items are plasma samples which are either HIV negative or HIV-1 positive. Plasma is separated from blood bags obtained from blood banks
2. The assigned values used for the HIV serology PT items are derived on the basis of test results of two ELISAs, two rapid and one Western Blot test.
3. All PT items have passed homogeneity and stability assessment.
4. Proficiency testing Scheme for HIV Serology is carried out twice a year.
5. Participants can appeal against the evaluation of their performance in the PT Scheme using the feedback form.
6. All information supplied by participant to the proficiency testing provider is treated as confidential. The identity of the individual participating laboratories are known only to the proficiency provider and NACO (for laboratories under NACO umbrella) if applicable.
7. The distribution of proficiency panel is subcontracted to courier agency
8. For any queries, participant can contact PT coordinator, ICMR-NARI.

Dr. Madhuri Thakar

Scientist F & Apex Lab Incharge
