Remarks:

1. The readings noted above are average of five readings.
2. The uncertainty expressed as Expanded uncertainty is calculated at the coverage factor $k=2$ at a confidence level of 95%.

The readings noted are particularly for the equipment submitted for calibration.

The reported values are valid at the time of calibration and under the controlled conditions.

Certificate should not be reproduced except in full with the prior approval of Laboratory.

Any handmade corrections made on the certificate, invalidates the Calibration Certificate.

The Ultimate Calibration Services will not be responsible for any mishandling of equipment after issuing the calibration certificate.

All precautions are being taken while handling the equipment at the time of calibration but lab is not liable for any misbehave of the equipment during calibration or any loss in the process of calibration.

The measurements are traceable to National/International standard.

The Calibration Certificate issued is for scientific and industrial purpose only.
