

To whom so ever it may concern
HIV Ab and HBs Ag EQAS results – regarding

Dear sir / Madam,

This is to declare that Likhitha's Diagnostics and Speciality Lab, Aundh, Pune, has participated RML Lucknow, Basic Serology EQAS program for serology. Laboratory had participated in the month of Jan and started getting samples from March onwards. In this phase laboratory had missed first sample / Cycle, in which HIV Ab and HBs Ag tests were covered, So laboratory has no EQAS reports for HIV & HBsAg parameters.

As a corrective measure laboratory has obtained CMC Vellore Virology EQAS , BBVS program samples from one of its sister concern laboratory which is already having NABL (MELT) Certification and processed samples for HIV and HBsAg tests.

The laboratory has done analysis of the Lab obtained results and EQAS final report received and it was found that the results are acceptable and satisfactory.

As laboratory has done renewal of the RML Basic serology EQAS program, lab will receive samples for HIV Ab and HBsAg in the coming cycles. The results of evaluation will be made available for NABL review.

Attachment:

1. Image of EQAS samples and test devices for HIV Ab testing
2. Image of EQAS samples and Test devices for HBsAg
3. Comparison report of LDSL Pune, CMC BBVS results and Sister Concern laboratory reports.
4. Final Report copy of sister concern laboratory.
