U.U.C. READING	Volume @ 27°(ml) Chanel 1	UNCERTAINTY^ in (%)		
1000	1.00	0.06		

<sup>^</sup>The reported uncertainty in measurement is stated as the standard uncertainty multiplied by the coverage factor k = 2, which for a normal distribution corresponds to a coverage probability of approximately 95% confidence level.

REMARKS:

• The recommended date for next calibration is mentioned, as asked by the customer.

Note

- 1. This report is not to be reported wholly or in part and cannot be used as evidence in any court of law and not to be used in any advertising media without our special permission in writing.
- 2. The result listed refers only to the calibrated samples and applicable parameters Endorsement of products is neither inferred nor implied.
- 3. Total liability of our organization is limited to the invoiced amount.
