06/11/2019

ORDER

External quality assessment scheme (EQAS) is a powerful tool that complements internal quality control measures adopted by any laboratory. The National AIDS Control Organization (NACO) has implemented the EQAS under Phase III of National AIDS Control Program to bring qualitative improvement in Human Immunodeficiency Virus (HIV) testing laboratories. As per protocol SRL sends coded sample to SA-ICTC which is tested by LT of SA-ICTC. In reverse manner 20% of all HIV reactive and 5% of all HIV nonreactive samples collected and tested in the 1st week of every quarter (January, April, July, October) by ICTCs need to be sent to the respective SRL. Both these methods are involves in cross-checking of the sample to determine external quality of the particular laboratories.

Standalone ICTCs should take part in EQAS (External Quality Assurance Scheme) programme as an integral part of HIV testing to maintain highest quality of services provided to the service recipient. As per present guideline atleast 95% beneficiaries should receive quality report.

There have been a lot of new inclusions & replacements of Standalone ICTCs in the last few years.

Therefore, SRL (State Reference Laboratory) wise Revised allocation of Standalone ICTCs has been revolved & placed in annexure-A.

Joint Director
Basic Service Division, WBSAP&CS
