

SID No : 02026896
Branch : DINDIGUL
Mr. SANTHANAKRISHNAN
Age / Sex: 70 Y / Male
Ref. By : **SHOBA HOSPITAL**
Doctor : Dr.SOKKAIYAN MBBS,.

Patient ID : 0200173813

Collected Date : 26/01/2023 / 11:37

Received Date : 26/01/2023 / 13:28

Reported Date : 26/01/2023 / 14:22

Final Test Report

Page 1 of 1

Specimen	Test Name	Result	Units	Reference Range / Method
IMMUNOLOGY				
Thyroid function tests				
Serum	T3	2.00	ng/ml	0.8 - 2 (ECLIA)
Serum	T4	6.06	ug/dl	5.1 - 14.1 (ECLIA)
Serum	TSH	46.450	uIU/ml	0.27 - 5.35 (ECLIA)
Kindly correlate with clinically.				
Note: TSH has a diurnal rhythm, peaks at 2.00-4.00 am and has lowest level at 5.00-6.00 pm with ultradian variation. Hence thyroid test is only a snapshot of what is occurring within a dynamic system and for treatment purpose, the results should be accessed in conjugation with patient medical history, clinical examination & other tests/finding for confirmation. Many multivitamins (such as Vit B7), supplements (especially hair, skin, and nail) and over-the-counter and prescription medications may affect thyroid test results, and their use should be discussed with the healthcare practitioner prior to testing. When a high serum TSH concentration and normal free T4 is found, repeat measurement 3-6 months later along with thyroid antibodies after excluding nonthyroidal illness and drug interference is recommended.
