Remarks:

- (1) Standard equipment use for calibration are traceable to national/international standards.
- (2) The reported expended uncertainty of measurement is stated as the standard uncertainty of measurement multiplied by coverage factor k = 2 such that the coverage probability corresponds to approximately 95%.(3) The above results are valid at the time of and under the stated conditions measurement.(4) This certificate is refers only to the particular item submitted for calibration. (5) Next calibration due date given as requested by the customer.
