Declaration of Serology Testing Method

This is to certify that all serology tests conducted in our laboratory are performed using the card method. This method is employed for its accuracy, efficiency, and reliability in detecting antibodies and antigens.

Details of Serology Tests:

- Test Name: Hepatitis B Surface Antigen (HBsAg), Anti-Hepatitis C Antibody (Anti-HCV Ab)
- Method Used: Card Method
- Purpose: Diagnosis of Hepatitis B and C- HBsAg for detection of Hepatitis B Virus Surface Antigen in serum and Anti-HCV Ab for detection of Antibody against Hepatitis C Virus in serum.

Quality Assurance:

- All tests are conducted following standard operating procedures (SOPs) and quality control measures.
- The card method is validated and regularly reviewed to ensure consistent and accurate results.
- Our laboratory staff are trained and proficient in performing serology tests using the card method.
